

Don't Let the NRA Take America Hostage

Poison Control To-Do List

Remove lead from gasoline

Remove lead from paint

Remove lead from toys

Remove lead from bullets

Every year our environment is polluted with about 14,000 tons of lead bullets. Some of it ends up in food, potentially threatening pregnant women and children. Some of it poisons our wildlife, killing up to 20 million birds and mammals every year.

The extreme positions of the NRA and the National Shooting Sports Foundation are holding our political system hostage. Just as they opposed a bill funding the confiscation of illegal guns from the mentally ill, they are now opposing the common-sense solution to eliminate toxic lead from bullets even though non-lead bullets are widely available.

Stand Against NRA Extremism.
Sign the Petitions.

Tell Congress

Tell Sen. Harry Reid and House Speaker John Boehner not to buckle to the NRA. It's time to stop lead poisoning once and for all.

Tell Obama

Tell President Obama, *I've had enough!* America will no longer be held hostage by the NRA's dangerous agenda. It's time to listen to the people and take action.
